WITH CAMP FRONTLINE, LTD.

VAPOR WAKE EDC SERVICES

UNMATCHED QUALITY AND
EFFECTIVENESS

PROVEN METHODOLOGY

UP-TO-DATE DETECTION
TECHNOLOGIES

Deadly, easily concealed explosive devices have become a major concern in the U.S. and around the world. T&M's Explosive Detection Services include highly trained canine and handler teams, as well as bomb technicians equipped with the latest detection technology, to protect global organizations, public spaces and critical infrastructure from weapons and explosives.

The Challenges:

- Thwarting highly sophisticated and fanatical elements intent on generating fear and publicity
- Locating explosive devices that can be concealed virtually anywhere and constructed to be exceedingly difficult or impractical to detect by traditional inspection methods
- Finding specialists skilled in reducing the risk of exposure to explosives and staying current with the latest technologies
- Seamlessly integrating explosive detection into an overall security plan

T&M's Explosive Detection Services combine highly trained explosive detection canine teams and bomb technicians to protect global organizations, public venues and critical infrastructure from concealed explosives.

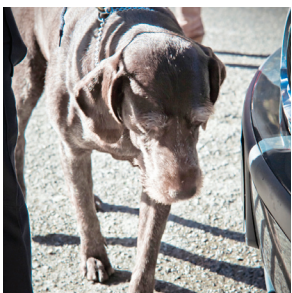

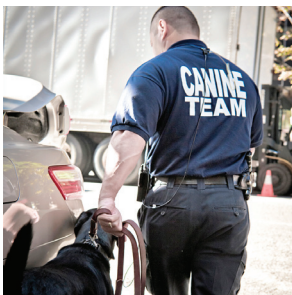

Benefits of T&M:

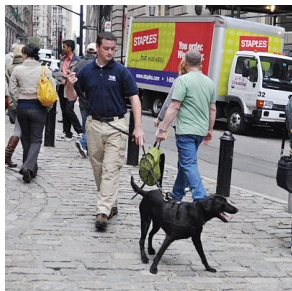

Customized, Comprehensive Programs

- Programs begin with a comprehensive assessment and evaluation of each client's risks, threats, vulnerabilities and security-related history
- Programs can include specially trained explosive detection canine (EDC) teams; X-ray and magnetometer monitoring and training; site, vehicle and package inspection services; mail room X-ray screening systems; and more
- T&M has the only private EDC program certified by the International Police Work Dog Association, the foremost authority on explosive detection canines

Exclusive Relationship with Camp Frontline, LTD.

- T&M has teamed with Mike Stapleton, President of Camp Frontline LTD., and a pioneer and recognized expert in the specialized training and handling of explosive detection canines, to strengthen and expand its EDC services
- Camp Frontline is a unique, state-of-the-art training facility that enables canines and their handlers to train with actual explosives on its ten acre campus, providing the most sophisticated and up-to-date explosive detection services available in the private sector today
- Camp Frontline is licensed by the Bureau of Alcohol, Tobacco, Firearms and Explosives, license #8-PA-089-33-2M02133. This enables Camp Frontline and T&M to possess and train canines using large quantities of live explosives to the standards set forth by the International Police Work Dog Association.

EXPLOSIVE DETECTION SERVICES

Vapor Wake EDC Services

- Vapor Wake canines have been specially trained to be continuously alert to odors in the air or 'vapor wake' that are emitted by explosive materials. The canines can track explosives that are on the move – such as those carried or worn by an individual in the manner of a suicide bomber
- Vapor Wake is the most advanced form of canine explosive detection and, until recently, was available only to governmental entities
- T&M is the first and only private security company offering Vapor Wake EDC Services
- Developed at Auburn University's College of Veterinary Medicine's Canine Detection Research Institute, Vapor Wake provides a host of new scenarios for specially trained explosive detection canines and their handlers and is being taught to EDC specialists from the NYPD and other urban police departments

Unmatched Quality and Effectiveness

- When forming canine-handler teams, T&M uses primarily the single-handler and play reward method
- T&M canines and handlers train with actual live explosives at Camp Frontline's ten acre campus and provide the most sophisticated and up-to-date explosive detection services available in the private sector today
- T&M has rapid deployment capability in response to events requiring explosive detection in New York City and throughout the tri-state region
- T&M's EDC training is led by Paul Stapleton, who has more than twenty years of experience and is a recognized expert in the training and handling of explosive detection canines

Proven Methodology

- T&M canines are bred and trained exclusively for detection of the following explosives: Dynamite, Data Sheet, Single Based Black Powder, Double Based Black Powder, Pyrodex, Smokeless Powder, WaterGel, PETN, TATP, Potassium Chlorate, Ammonium Nitrate, ANFO, C-4, HMX, Composition B, Flash Powder, Kenistik, Detonation Cord, Safety Fuse
- Bomb technicians and explosive detection handlers have extensive law enforcement and/or military experience and are provided with the most current training on the latest technology in the field of explosives and explosive detection canines

Up-to-Date Detection Technologies

- T&M can provide explosive detection systems and technologies, including X-ray systems, to meet the latest government requirements and other regulations
- T&M can rapidly deploy walk-through weapons detectors that can identify the exact location of concealed weapons with proprietary technology for faster throughput and fewer false alarms
