

THREAT ANALYSIS &  
VULNERABILITY ASSESSMENTS

SECURITY MASTER PLANNING

FRACTIONAL CSO™ PROGRAM

EMERGENCY PREPAREDNESS  
SERVICES

Threats ranging from global terrorism to workplace violence have forced companies and institutions to take a closer look at their security programs. T&M brings innovation to the field of security consulting by employing a proven risk reduction methodology to aid its clients in the development and establishment of effective and cost-efficient security measures. In assessing clients' needs, we dedicate our attention to ensuring that prudent security decisions are based on a thorough analysis of current conditions and that recommendations are appropriate to the level of threat. Further, we develop and provide training on a full scope of security policies and procedures to enable our clients to be prepared for such matters as emergency management, business continuity and other security matters.

### The Challenges:

- Designing a comprehensive and thorough security master plan that is based on level of threat and includes operational, physical and logical security solutions and proven measures of protection
- Developing written security policies and procedures for an extensive range of business processes, incidents and situational scenarios
- Making informed decisions when procuring security systems and equipment to ensure that devices:
  - Integrate to maximize efficiency and optimize system capabilities
  - Represent the best in current technology and security offerings
  - Are expandable and offer the ability to add-on additional system devices as needed
- Obtaining independent, expert security advice when needed, without hiring a security manager and requisite security staff

**T&M offers prudent security recommendations based on a thorough understanding of each client's unique operating environment and vulnerabilities.**

### Benefits of T&M:

#### Depth of Experience

- Comprehensive security consulting services provided by established professionals with extensive field experience and industry-recognized certifications
- Security experts that develop proactive, multi-disciplined approaches using proven methodologies to facilitate rapid response to changing threat conditions and to help guarantee operational continuity during and after a serious a crisis
- A diversified client base which ensures that all clients receive composite security solutions rooted in demonstrated and verified strategies and practices

### **Independent and Prudent Decisionmaking**

- Independent security advice and recommendations that are not influenced by compensation or remuneration from security system manufacturers or system integrators
- Security recommendations that take into account and evaluate whether security systems or personnel are more cost-effective in meeting client security objectives
- Practical solutions based on foresight and extensive experience providing security assessments and recommendations to diverse clientele
