TECHNICAL SURVEILLANCE COUNTERMEASURES

Protecting corporate assets and securing the facility is paramount to maintaining a safe and productive workplace. Access control, closed-circuit television surveillance, technical surveillance countermeasures and intrusion detection are just several systems implemented in today's businesses to counter such issues as workplace violence, criminal trespass, theft of articles and covert intelligence gathering. T&M provides integrated solutions to these problems through consultation, analysis, design, installation, documentation, training, maintenance and technical support for the latest in security system offerings.

The Challenges:

- Providing employees with a safe, secure and productive workplace
- Ensuring that unauthorized individuals are not permitted access to the facility beyond public access areas
- Minimizing or eliminating employee theft of company property or personal valuables
- Assigning a variety of access control levels to areas throughout the facility to aid in the protection and security of sensitive or high profile spaces

T&M's technical security team acts as an integrated security partner to help plan and implement electronic security solutions.

Benefits of T&M:

Customized, Comprehensive Programs

- All security system designs begin with a thorough evaluation of client security goals and objectives and a comprehensive assessment of existing systems and vulnerabilities
- The evaluation is followed by the development and implementation of a customized security system that is designed and commissioned with each client's unique needs in mind
- After implementation, T&M can provide prompt and cost-efficient on-call maintenance and service visits for all system devices

Unparalleled Technical Expertise

- The reliability that comes from a multi-disciplined team with more than 200 years of combined technical experience that serves to address the most demanding security requirements and meet the most complex needs
- A wide range of industry-specific application experience, including financial services, commercial real estate and property management, broadcast media, accounting services, telecommunications, transportation, museums and galleries, stadiums and arenas, and private residences

- Comprehensive knowledge and access to the latest in state-of-the-art electronic security solutions and applications
- Proven ability to evaluate technology and non-technology options to provide the best products to resolve security system and budgetary requirements
- Vendor-certified technicians that provide timely, efficient, quality service – from installation to field repairs or modifications to on-going maintenance and service

Flexible, Effective Solutions

State-of-the-art technologies, including integrated solutions that blend a broad range of technologies, including:

- Access control systems
- CCTV/DVR and video surveillance systems
- Technical surveillance countermeasures
- Concealed weapons detection
- Visitor ID and badging systems
- Security hardware devices

Leading Industry Products, Systems and Applications

Access Control Systems

- GE Security
- Software House
- Honeywell
- HID Corporation
- Motorola/Indala
- Bioscrypt
- Essex
- IEI

Security Systems

- Honeywell
- Linear
- Sentrol
- Pulnix
- DSI Systems
- Altronix
- Visonic

Security Hardware Devices

- Locknetics
- Securitron
- Folger Adams
- Von Duprin
- Hess
- Schlage

CCTV and DVR Systems

- GE Security/Kalatel
- Panasonic
- Sony
- American Dynamics
- Weldex
- Pelco
- Avigilon
- Toshiba
- Airship
